DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 10-12, 14-20, 22-26 and 28-31 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Sanders (US Patent 4,445,811) or Zelik (US Patent 3,447,001) in view of Seely et al (US Patent 3,811,361).

Sanders or Zelik teaches most of the elements of the claimed invention.

However, Sanders or Zelik may fail to teach a nut defining an internally threaded bore extending therethrough, rotatably supported in relation the receptacle of the carriage.

Seely teaches a support assembly having a carriage with a receptacle and a nut (fig.4) rotatably supported in relation to the receptacle. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a nut as suggested by Seely in the device of Sanders or Zelik for the purpose of providing a tightening of a bit and loosening to change, remove or replace the bit.

Allowable Subject Matter

Claims 13, 21 and 27 are finally objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3725

Response to Arguments

Applicant's arguments filed 07/24/06 have been fully considered but they are not persuasive. In reference to Applicant's remarks that the combine references fails to disclose a nut that is rotatably secured to a receptacle of a carriage wherein the nut also defines an internally threaded bore that threading receives an exterior threaded portion of a housing of a hand-held power tool, the Examiner disagrees. Applicant further argues that the internally threaded nut 38 of Seely is clearly not rotatable secured to the receptacle of the carriage, rather the nut is secured to the spindle of the power tool, and the Examiner disagrees. The disclosed claim recite "a housing having an exterior threaded portion and a drive spindle" and the Examiner interprets the drive spindle as a part of the housing; therefore, Seely clearly teaches, as noted above by Applicant, the nut is secured to the spindle of the power tool, in this instance, the nut is secured to the housing via the spindle of the power. The Examiner takes the position that the combination of prior art meets the claimed invention.

For the reasons set forth above, this Office Action has been made Final.

Conclusion

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE**

Application/Control Number: 10/680,513

Art Unit: 3725

FINAL even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 571.272.4427.

The examiner can normally be reached on Monday-Friday.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
